## INTRODUCTION

Third-year Computer Science and Engineering student at Chandigarh University with expertise in web development and machine learning. Passionate about building scalable, high-performance applications to solve real-world problems. Experienced in collaborative projects, problem-solving, and developing efficient solutions using cutting-edge technologies.

## EDUCATION

|                                                                                     |                                          |
|-------------------------------------------------------------------------------------|------------------------------------------|
| <b>Chandigarh University</b><br><i>Bachelor of Engineering - CGPA: 7.74</i>         | August 2022 – June 2026<br>Punjab, India |
| <b>Kendriya Vidyalaya No.2, Kalaikunda</b><br><i>Senior Secondary (XII) – 87.7%</i> | 2022<br>West Bengal, India               |
| <b>ST. Agnes School</b><br><i>Secondary (X) – 95.2%</i>                             | 2020<br>West Bengal, India               |

## PROJECTS

### NLP-based Personalized Learning Platform | Python, NLP, Flask, Scikit-learn

- Developed an NLP-driven platform to deliver personalized learning experiences based on individual student needs.
- Utilized NLP techniques to analyze student responses and dynamically adjust content for improved engagement and comprehension.
- Leveraged machine learning models for content recommendation and performance prediction, enhancing learning outcomes.
- Deployed the platform as a web application using **Flask**, ensuring seamless interaction and real-time adaptability for users.

### Pinterest Clone | React, Node.js, MongoDB, Express

- Developed a fully functional Pinterest clone with user authentication, image uploading, and interactive boards.
- Implemented a responsive front-end using **React** to ensure an engaging and smooth user experience.
- Integrated **MongoDB** for efficient data storage and management, allowing users to create, edit, and organize boards.
- Utilized Node.js and Express to build the back-end API, enabling seamless image storage and retrieval.

## TECHNICAL SKILLS

**Languages:** Java, Python, SQL, HTML, CSS, JavaScript

**Frameworks/Libraries:** React.js, Node.js, MongoDB, Express.js, Pandas, NumPy

**Tools:** Figma, Git, Matplotlib

## ACHIEVEMENTS

- MUJ HackX 2.0 Finalists** – Recognized for innovative solutions using **Machine Learning** and technical proficiency.
- Industrial Training in NLP and Web scraping** – Hands-on experience in data extraction and language processing.
- Speak-O-Vista Season 19 Finalist** - Recognized for excellence in communication, collaboration, and leadership in a three-stage competition organized by DCPD.
- Instinct 3.0, Shortlisted for 2nd Round** - Shortlisted in Intellismart's hackathon to develop a peer-to-peer energy trading platform.
- Chase the Code** – Secured 2<sup>nd</sup> position in Chase the Code an event organized by Computer Society of India.
